SUMMARY

I am a dynamic Data Analyst with a robust statistical background and expertise in Excel, SQL, Python, and R. I excel at analysing complex datasets to derive actionable insights and effectively communicate findings to non-technical audiences. Currently pursuing a B.Tech in AI and Data Science, I have hands-on experience in machine learning. My skills allow me to simplify intricate information, making data-driven decisions accessible and understandable. I am passionate about leveraging data to solve real-world problems and drive business growth.

EXPERIENCE

Python Programming Intern

VaultOfCodes September 2023 - November 2023, New Delhi(remote)

- **Developed** a software application using Python, specializing in small game development.
- **Performed** debugging and troubleshooting to enhance software performance and reliability.
- **Collaborated** with team members to design, implement, and test software features.
- **Utilized** tools and libraries such as PyCharm, NLTK, and natural language processing to improve functionality.

PROJECTS

1) Ayurvedic Medicine Recommendation System:

Description: Developed a system suggesting Ayurvedic medicine based on user-given diseases, emphasizing Ayurveda's daily life benefits.

Technologies: Python, Machine Learning, Natural Language Processing

- Created an algorithm for matching diseases with Ayurvedic treatments.
- Researched and integrated Ayurvedic medicine data.
- Developed a user-friendly interface for non-technical users.
- Analysed user feedback to enhance system accuracy.

2) Cat Image Classification System:

Description: Developed a deep learning model to classify images as cat or not cat using neural networks.

Technologies: Python, Deep Learning, Neural Networks

- Designed and trained a neural network for image classification.
- Pre-processed and labelled large image datasets.
- Optimized model performance and accuracy through iterative testing.

3) Next-Word Prediction System:

Description: Created a next-word prediction model to assist in sentence completion using Python NLP and n-grams.

Technologies: Python, Natural Language Processing, n-grams

- Developed and trained an n-gram model for next-word prediction.
- Implemented NLP techniques to process and analyse text data.
- Enhanced user typing experience with accurate word predictions.

Mobile Site Project:

<https://prajwalbangi07.github.io/mobile-site/>

- **Description:** Developed a mobile-friendly website showcasing various mobile features with interactive elements.

- **Technologies Used:** HTML, CSS, JavaScript

- User interactivity through dynamic content and responsive design.
- Implementation of mobile-specific features such as touch gestures and mobile navigation.
- Designed and implemented the front-end interface using HTML and CSS.
- Developed interactive functionalities using JavaScript.

EDUCATION

Bachelor of Technology in Artificial intelligence and Data science

Minor in Data Analytics • Reva University • Bengaluru • 2021

- Pursuing B.tech in Artificial intelligence and data science with a CGPA of 8.027

PCMB

Sai niketan pu college Jamkhandi. 2019

Completed my PCMB in 2019 with the percentage of 83.83

SKILLS

Frontend: HTML, CSS, JAVASCRIPT

Data Analytics: SQL, Python, PowerBi, Tableau, Excel

Coding languages: C programming, Python, R, SQL

CERTIFICATIONS

Natural Language Processing (NLP) Tutorials

Infosys • 2024

- Completion of a course related to NLP

Internship completion certificate

VaultOfCodes • 2023

- Certificate that shows that I have complete my internship.

IEEE appreciation

IEEE • 2023

- Retina Vigil: Deep Learning-Enabled Retinopathy Detection for Early Disease Assessment
- Successfully published on the IEEE Xplore digital library.

Digital engineering

NASSCOM • 2023

- Completed digital engineering certification in Artificial Intelligence and Machine Learning and Cyber Security

Hobbies: Playing cricket, badminton and chess, singing.
